

COMMUNITY BENEFITS CASE STUDY

Greenock Health and Care Centre

Prospecthill Church Engagement

bam

hub
West Scotland

Greenock Health Centre is a £19m state of the art, primary care centre located on the former site of Wellington Academy in Dempster Street. Housed in a new three storey building, the facility will bring together four existing GP practices, district nurses, health visitors, dental and podiatry departments and a number of out-patient clinics. The centre which will also feature a new community café.

As part of our community engagement across the project, the site team were approached by Prospecthill Fellowship Church to support with clearing a path and creating access to a room for community use.

The team were happy to support and helped to clear and level the path for the church, providing a skip and machinery to support. The value of the support was approximately £3000.

The site team are continue to engage with the church and will provide support where possible.

“Liam has been a great help in leveling the ground and making a pathway for us for which we are really the grateful. This gives us access to the room from which hopefully we can try to raise funds to get fitted out for use as a community gym”.
