

Strategic Planning and Performance Management Framework

Inverclyde Council has developed a comprehensive Strategic Planning and Performance Management Framework (SPPMF). The Framework integrates strategic planning and performance management to ensure the effective delivery of corporate and service outcomes and is underpinned by the principles of robust self-evaluation, such as Validated Self Evaluation and the Public Service Improvement Framework (PSIF). This will promote a culture of continuous improvement within the Council and help to ensure that the Council continues to deliver Best Value. The main aspects of the SPPMF are outlined in the diagram below.
